CYBERSECURITY GRADUATE

Security engineer | Red team home lab | Software projects

Tulsa, Oklahoma

sentricorex@gmail.com

PROFILE

I am a cybersecurity graduate and security engineer based in Tulsa, Oklahoma. I build red team scenarios in my own home lab and develop web and mobile software.

My interests connect security engineering, practical systems work, and software that keeps clear boundaries around access, data, and privacy.

SELECTED SOFTWARE PROJECTS

NestBudget

Web & iPhone app

Family budgeting, household access, and financial model test definitions.

Hatlangh Beh

Hosted development preview

Community and genealogy with audience rules and family-record privacy.

KapCore

In development

Field operations with organization boundaries and role permissions.

Kap Services

Development project

Business workflows, input validation, and invoice calculations.

HOME LAB

Personal home lab focused on building red team scenarios.

TECHNICAL CONVERSATION

Access control and tenant isolation; data integrity; field visibility and privacy; security-focused software projects.
